Introduction | what is Node.JS

Node JS tutorial in Hindi #1 Introduction | what is Node.JS

What is Node js

Node js is runtime environment for javaScript.

Node we can run JavaScript outside to the browser

Like server, windows, mac , linux etc

JavaScript run inside the browser.

Where we need JS outside browser

Web browser Run on client computer.

So Javascript do not handle things on server.

So we can not connect javascript with Database directly

Can not handle File system etc

So we have to run javascript on browser and Node help for this

Why need Node

Unified Language

High Performance

Good for Real-time Applications

Good for Data Streaming

Etc

How to use it full stack and FE technology

We make API in node js.

Integrate APIs with FE technology.

BE+FE = Full Stack.

History Of Node js

First Release :- May 27, 2009

Current Version: V22.16.0

Written in JS, C and c++
